

## 1957 FORD RANCHERO

This 1957 Ranchero Custom was purchased by the Nicola Bulgari Car Collection in 2012, and was part of the Nick Alexander Collection in California, where it had been completely restored before being sold. It is equipped with a V8 engine and the standard manual three-speed transmission. The red and white interior is the same used on the Del Rio wagon. The vinyl has a red checkered pattern that contrasts very nicely with the white bolsters and is a nice upgrade to the plain gray cloth seats in the standard Ranchero. Other great features are the full circle horn ring and the radio.

The truck is quite frequently used to pick up parts for Allentown Classic Motor Cars, doing its humble work with a lot of style and class, as Ford had originally planned.
